

LISTING OF CLAIMS

1. (Currently Amended) A nozzle comprising an air outlet aperture across which there is situated at least one electrically isolated thermal-capacitance element ~~to moderate changes in temperature of air exhausted through the nozzle~~ configured to moderate air temperature of air exhausted through the nozzle by absorption, retention and re-radiation of thermal energy contained in the air exhausted through the nozzle.
2. (Original) The nozzle of claim 1 wherein the element has opposed ends and the outlet aperture has slots therein into each of which a respective said opposed end is received.
3. (Original) The nozzle of claim 1 comprising a pair of said elements in parallel spaced-apart interrelationship.
4. (Original) The nozzle of claim 1 wherein the element is made of a material selected from the group consisting of ceramic, metal and glass.
5. (Original) The nozzle of claim 1 being formed integrally with a hairdryer body.
6. (Original) The nozzle of claim 1 being formed as an attachment for a hairdryer body.
7. (Previously Presented) The nozzle of claim 5 having comb teeth extending from the outlet aperture.
8. (Previously Presented) The nozzle of claim 6 having comb teeth extending from the outlet aperture.
